

### ***7.1.5 Green campus initiatives include***

In 2010 when the NAAC team has visited the college they praised the greenery of the college campus in the exits meeting. The following initiative has been taking by the authority

Ø. There are approximately 150 varieties of species on the campus. All plants have been labeled with local and scientific names.

Ø. The sericulture garden is converted as ECO Zone. Variety of butterfly and migratory birds, insects has visited the eco zone making a hot spot of Flora and Fauna for the students especially studying live science. The botany department uses the reach biodiversity elements for its practical and project work.

Ø. A Botanical garden under the Department of Botany is under construction.

Ø. A pond at the entrance of the college campus enhances biodiversity with the presence of a verity of fish, amphibians, reptiles, etc.

Ø. The cleanness of the campus and good drainage system keep the campus clean.

Ø. World environment day and environmental-related seminars, popular talks are organized in the campus.

Ø. The campus has been declared a Plastic-free zone. The initiative has been taken reduce the use of paper in official work by digitalizing the administration.

Few photos of the campus
